

For Parents of Students in Grades K-10 with iPads

The Securly portal gives parents insight into a child's online activity by providing snapshots of search histories and sites visited, delivered via user-friendly dashboards and e-mail reports. This comprehensive report of student activity only works on district managed iPads in grades K-10 but is intended to work no matter the location of the iPad as long as it's connected to WiFi.

Mariemont City Schools subscribes to this web based filtering software as an added layer of student protection and monitoring. This service is now available to parents to monitor their individual children's activity.

To sign up for parent portal access to Securly, please complete the form here: * [FORM](#)

**Please make sure to mention all of your students you would like to be connected with.*

After filling out the form your name will be submitted to Securly parent portal for account creation. Please give 24-48 hours after submission to receive an automated welcome email.

Follow the steps in the email to create your portal account.

Weekly email reports are sent every Sunday. If the child does not generate activity during the week, a report will not be sent.

Once your name has been submitted for portal access your personalized dashboard will be created.

You may check Securly dashboard either via their app or website.
